

# COMPREHENSIVE RENEWABLE ENERGY

---

EDITOR-IN-CHIEF

**Ali Sayigh**

*Chairman of WREC, Director General of WREN, and  
Chairman of IEL, Brighton, UK*

VOLUME 2

**WIND ENERGY**

VOLUME EDITOR

**John K. Kaldellis**

*Technological Education Institute of Piraeus, Athens, Greece*

ELSEVIER

AMSTERDAM BOSTON HEIDELBERG LONDON NEW YORK OXFORD  
PARIS SAN DIEGO SAN FRANCISCO SINGAPORE SYDNEY TOKYO

**Applications**

1.32	Design and Components of Photovoltaic Systems <i>WGJHM van Sark</i>	679
1.33	BIPV in Architecture and Urban Planning <i>TH Reijenga and HF Kaan</i>	697
1.34	Product-Integrated Photovoltaics <i>AHME Reinders and WGJHM van Sark</i>	709
1.35	Very Large-Scale Photovoltaic Systems <i>T Ehara, K Komoto, and P van der Vleuten</i>	733
1.36	Concentration Photovoltaics <i>M Martinez, O de la Rubia, F Rubio, and P Banda</i>	745
1.37	Solar Power Satellites <i>GA Landis</i>	767
1.38	Performance Monitoring <i>N Pearsall and R Gottschalg</i>	775
1.39	Standards in Photovoltaic Technology <i>H Ossenbrink, H Mülleijans, R Kenny, and E Dunlop</i>	787

**Volume 2 Wind Energy**

2.01	Wind Energy – Introduction <i>JK Kaldellis</i>	1
2.02	Wind Energy Contribution in the Planet Energy Balance and Future Prospects <i>JK Kaldellis and M Kapsali</i>	11
2.03	History of Wind Power <i>DT Swift-Hook</i>	41
2.04	Wind Energy Potential <i>H Nfaoui</i>	73
2.05	Wind Turbines: Evolution, Basic Principles, and Classifications <i>S Mathew and GS Philip</i>	93
2.06	Energy Yield of Contemporary Wind Turbines <i>DP Zafirakis, AG Paliatsos, and JK Kaldellis</i>	113
2.07	Wind Parks Design, Including Representative Case Studies <i>D Al Katsaprakakis and DG Christakis</i>	169
2.08	Aerodynamic Analysis of Wind Turbines <i>JN Sørensen</i>	225
2.09	Mechanical-Dynamic Loads <i>M Karimirad</i>	243
2.10	Electrical Parts of Wind Turbines <i>GS Stavrakakis</i>	269
2.11	Wind Turbine Control Systems and Power Electronics <i>A Pouliezos</i>	329
2.12	Testing, Standardization, Certification in Wind Energy <i>F Van Hulle</i>	371
2.13	Design and Implementation of a Wind Power Project <i>T Wizelius</i>	391
2.14	Offshore Wind Power Basics <i>M Kapsali and JK Kaldellis</i>	431

2.15	Wind Energy Economics <i>D Milborrow</i>	469
2.16	Environmental-Social Benefits/Impacts of Wind Power <i>E Kondili and JK Kaldellis</i>	503
2.17	Wind Energy Policy <i>GC van Kooten</i>	541
2.18	Wind Power Integration <i>JA Carta</i>	569
2.19	Stand-Alone, Hybrid Systems <i>KA Kavadias</i>	623
2.20	Wind Power Industry and Markets <i>PE Morthorst</i>	657
2.21	Trends, Prospects, and R&D Directions in Wind Turbine Technology <i>JK Kaldellis and DP Zafirakis</i>	671
2.22	Special Wind Power Applications <i>E Kondili</i>	725

### **Volume 3 Solar Thermal Systems: Components and Applications**

#### **Solar Thermal Systems**

3.01	Solar Thermal Systems: Components and Applications – Introduction <i>SA Kalogirou</i>	1
3.02	Solar Resource <i>HD Kambezidis</i>	27
3.03	History of Solar Energy <i>VG Belessiotis and E Papanicolaou</i>	85

#### **Components**

3.04	Low Temperature Stationary Collectors <i>YG Caouris</i>	103
3.05	Low Concentration Ratio Solar Collectors <i>SA Kalogirou</i>	149
3.06	High Concentration Solar Collectors <i>B Hoffschmidt, S Alexopoulos, J Göttsche, M Sauerborn, and O Kaufhold</i>	165
3.07	Thermal Energy Storage <i>LF Cabeza</i>	211
3.08	Photovoltaic/Thermal Solar Collectors <i>Y Tripanagnostopoulos</i>	255
3.09	Solar Selective Coatings <i>P Yianoulis, M Giannouli, and SA Kalogirou</i>	301
3.10	Glazings and Coatings <i>G Leftheriotis and P Yianoulis</i>	313
3.11	Modeling and Simulation of Passive and Active Solar Thermal Systems <i>A Athienitis, SA Kalogirou, and L Candanedo</i>	357

## VOLUME EDITORS

---

Dr. Wilfried G. J. H. M. van Sark graduated from Utrecht University, the Netherlands, with an MSc in experimental physics in 1985, and with an MSc thesis on measurement and analysis of  $I$ - $V$  characteristics of  $c$ -Si cells. He received his PhD from Nijmegen University, the Netherlands; the topic of his PhD thesis was III-V solar cell development, modeling, and processing. He then spent 7 years as a postdoc/senior researcher at Utrecht University and specialized in  $a$ -Si:H cell deposition and analysis. He is an expert in plasma chemical vapor deposition, both radio frequency and very high frequency. After an assistant professor position at Nijmegen University, where he worked on III-V solar cells, he returned to Utrecht University, with a focus on (single-molecule) confocal fluorescence microscopy of nanocrystals.

In 2002, he moved to his present position as assistant professor at the research group Science, Technology and Society of the Copernicus Institute at Utrecht University, the Netherlands, where he performed and coordinated research on next-generation photovoltaic devices incorporating nanocrystals; for example, luminescent solar concentrators, as well as photovoltaic performance, life cycle analysis, socioeconomics, and policy development. He is member of the editorial board of Elsevier's scientific journal *Renewable Energy*, and member of various organizing committees of the European Union, the Institute of Electrical and Electronics Engineers (IEEE), and the SPIE PV conferences. He is author or coauthor of over 200 peer-reviewed journal and conference paper publications and book chapters. He has (co-)edited three books, including the present one.

Professor John K. Kaldellis holds a mechanical engineering degree from the National Technical University of Athens (NTUA) and a business administration diploma from the University of Piraeus. He obtained his PhD from NTUA (Fluid Sector) sponsored by Snecma-Dassault, France, and Bodossaki Foundation, Greece. He is currently the head of the Mechanical Engineering Department and the director of the Soft Energy Applications and Environmental Protection Laboratory of the Technological Education Institute (TEI) of Piraeus. Prof. Kaldellis is also the scientific director (for TEI of Piraeus) of the MSc in energy program organized by Heriot-Watt University and TEI of Piraeus. His scientific expertise is in the fields of energy and the environ-

ment. His research interests include feasibility analysis of energy sector applications; technological progress in wind, hydro, and solar energy markets; hybrid energy systems; energy storage issues; social attitudes toward renewable energy applications; and environmental technology-atmospheric pollution. He has participated in numerous research projects, funded by the European Union, European/Greek Industries, and the Greek State. Prof. Kaldellis has published six books concerning renewable energy applications and environmental protection. He is also the author of more than 100 scientific/research papers in international peer-reviewed journals and more than 300 papers for international scientific conferences. During the last decade, he was also a member of the Scientific Committee of the Hellenic Society of Mechanical-Electrical Engineers as well as a member of the organizing and scientific committee of several national and international conferences. He is currently a member of the editorial board of the *Renewable Energy International* journal and reviewer in more than 40 international journals in the energy and environment sector. He is the editor of the book *Stand-Alone and Hybrid Wind Energy Systems: Technology, Energy Storage and Applications* that has recently been published.
